TECHNICAL SKILLS & TOOLS

- HTML & CSS
- JavaScript
- React
- Git & GitHub
- VS Code
- Claude (AI-assisted development)
- Slack / ClickUp

SOFT SKILLS

- Communication skills
- Teamwork & collaboration
- Problem-solving skills
- Organisation & time management

AWARDS & CERTIFICATIONS

- Zaio Web Development Certificate – NQF 4
- National Senior Certificate (Matric)

PROFILE

Junior Web Developer with hands-on experience building responsive websites and interactive web applications using HTML, CSS and JavaScript. Currently developing my skills through the iHub Africa Web Development Training Program, in partnership with the Zaio Institute of Technology. I enjoy solving problems through code, learning new technologies, and turning ideas into functional, user-friendly digital experiences. I am particularly interested in growing my skills in JavaScript, React, APIs, cloud technologies, and eventually cloud engineering.

WORK EXPERIENCE

iHub Africa — Coding Bootcamp

March 2026 – Present

- Develop responsive websites using HTML, CSS and JavaScript.
- Build interactive web applications using JavaScript and DOM manipulation.
- Work with APIs and use fetch() to retrieve and display external data.
- Build React applications using components, state and props.
- Use Git and GitHub for version control and project collaboration.
- Develop projects that focus on responsive design, usability and user experience.
- Participate in coding exercises, team projects, presentations and collaborative problem-solving.

PROJECTS

Personal Portfolio

- Designed and developed a responsive personal portfolio website.
- Showcases web development skills, projects and technical growth.
- Built using HTML, CSS and JavaScript.

Book Finder — React Application

- Built a React application that searches for books using the OpenLibrary API.
- Used fetch() to retrieve API data and display search results dynamically.

Barber Queue Management Website

- Developed a responsive barber booking and queue-management website using HTML, CSS and JavaScript.
- Implemented an interactive booking form that captures customer information and dynamically adds customers to a queue.
- Used JavaScript arrays and objects to manage and display customer queue data dynamically.
- Implemented DOM manipulation and event handling to update the interface based on user interactions.
- Designed a user-focused interface with clear calls-to-action for booking appointments and viewing services.
